

LEGO ROBOTICS MATERIALS NEEDED

Hello friends of Cobb School. We would like to start a Lego Robotics class for our middle school students. Technology and computer programming are essential skills for our students to compete in this global economy. Ian Evans would like to teach this class. Each Lego Mindstorm kit costs about \$300. We would like to purchase 5 kits. If you would like to donate towards this robotics program, please let us know. Any donation you make is tax deductible. As soon as we have the materials, we can offer the class. This class would most likely meet as a club after school to compete in the Lego Robotics program as well.
