

Expectations

Our purpose is to design a program to prepare our students for Kindergarten. We work on both social and academic skills in a nurturing environment.

We provide opportunities for the children to problem solve in free time and in group activities. Kelso's Wheel is used to give tools and choices when they encounter a conflict or need to resolve a problem.

In the academic program, the children are assessed and placed at an instructional level based on their needs. We teach the children beginning reading and math skills as well as the content areas.

**Class
Motto**

**"Be
The Best
YOU
Can Be!"**

Cobb School Philosophy

Cobb School's philosophy is to provide developmentally appropriate programs for all children;
to foster the development of emotional health in each child;
and to stimulate each child's natural interest in, and enjoyment of, learning

For children who are age 4 by September 1,
of enrollment year.
